PERSONAL PROJECTS

WHATSAPP ROOMS

It is a web application built using **React Js** and **Firebase**. It allows you to create and join public rooms and send text messages and emojis in real-time.

SPOTIFY CLONE

It is a clone of the original web version of Spotify. It uses **Spotify OAuth** to authenticate users and allows them to search for songs and view their playlists. It is built using **React Js**.

OPEN MY SESSIONS

It is a **chrome extension** that I built to ease my day-to-day work. It allows you to **add websites** and **tag them** and then open all the websites of a particular tag at one click rather than opening each manually.
